RANJIT PATIL

Full Stack Developer

+91 8767751737 | ranjitpatilsknscoecomp@gmail.com | github.com/ranjitpatil7 | linkedin.com/in/ranjit-patil-3236b72a4

PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student with hands-on experience building full-stack web applications using React.js, TypeScript, Node.js, Python FastAPI, and Java Spring Boot. Skilled in developing responsive user interfaces, REST APIs, real-time dashboards, and database-driven applications using PostgreSQL, MySQL, MongoDB, and Redis. Seeking a Full Stack Developer role to apply my technical skills and build reliable, user-friendly applications.

EDUCATION

Bachelor of Engineering – Computer Science and Engineering (Honors - AI & ML) **2023–2027 | CGPA: 7.52**
SKN Sinhgad College of Engineering, Pandharpur

Higher Secondary Certificate (HSC – 12th) **Percentage: 75.67%**
Ligade Patil Junior College of Science, Karad

Secondary School Certificate (SSC – 10th) **Percentage: 81.40%**
Shivanjali English Medium School, Navarasta

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, React Query, Redux Toolkit, Tailwind CSS, shadcn/ui, Vite, MapLibre GL JS, Recharts

Backend: Spring Boot, Node.js, Express.js, FastAPI, REST APIs, Socket.io, JPA/Hibernate, SQLAlchemy, JWT, Role-Based Access Control (RBAC)

Databases & Messaging: PostgreSQL, PostGIS, MySQL, MongoDB, Neo4j, Redis, Redpanda (Kafka)

DevOps, Testing & Tools: Docker, Docker Compose, Nginx, Flyway, Alembic, Git, GitHub Actions, Pytest, Vitest, JUnit 5, Linux

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, Concurrency Control

INTERNSHIP EXPERIENCE

Full Stack Development Intern | Cognifyz IT Solutions Pvt. Ltd. | Remote **Oct 2026 – Present**

- Develop responsive frontend components using React and TypeScript and integrate them with backend REST APIs.
- Implement form validation, API data fetching, and authentication-related features while following the application's access-control requirements.
- Work with relational databases to design schemas, write SQL queries, and troubleshoot API and database integration issues.

PROJECTS

TicketReserve | Event Ticketing & Seat Reservation Platform [GitHub] **2026**
[React, TypeScript, Tailwind CSS, React Query, Java 17, Spring Boot, Spring Security, JWT, JPA/Hibernate, MySQL, Redis, Flyway, Docker]

- Built a full-stack ticket booking application with seat selection, booking management, and checkout features using React and Spring Boot.
- Prevented duplicate seat reservations through Redis atomic locks, JPA optimistic locking, and MySQL constraints.
- Implemented booking status transitions, idempotency checks for repeated requests, and automatic release of expired seat holds.
- Secured APIs using JWT authentication, role-based access control, and booking ownership checks.

Aegis Cloud Telemetry | IoT Fleet Management Platform [GitHub] **2026**
[React, TypeScript, MapLibre GL JS, Turf.js, Node.js, Express, Socket.io, Redpanda (Kafka), Redis, MongoDB, Docker]

- Built a real-time fleet monitoring platform that simulates telemetry from 1,000 trucks per second and displays vehicle locations on an interactive map.
- Implemented live location updates and geofence alerts using Socket.io, Redis Pub/Sub, MapLibre GL JS, and Turf.js.
- Added historical route playback by retrieving vehicle location records from MongoDB and displaying routes on the map.
- Implemented Kafka-based error handling with a dead-letter queue and retry worker, along with temperature-trend monitoring to flag potential engine overheating.

EpiGuard AI | Community Health Monitoring & Early-Warning Platform [GitHub] **2026**
[React, TypeScript, Tailwind CSS, FastAPI, Python, SQLAlchemy, PostgreSQL, PostGIS, Redis, XGBoost, Docker]

- Developed a public-health decision-support platform to help health officials monitor water-quality data and identify areas at risk of water-borne diseases.
- Built role-based dashboards for administrators, health officials, analysts, and community workers, with regional risk visualization using PostGIS.
- Integrated data validation, anomaly detection, and machine-learning workflows to support risk analysis across live, demo, and simulation modes.
- Co-authored a published research paper and registered a patent based on the platform's predictive community health monitoring workflow.

CERTIFICATIONS, PUBLICATIONS & ACHIEVEMENTS

Patent & Publication: Published research paper and registered patent for *"Smart Community Health Monitoring and Early Warning Platform"* (EpiGuard AI, 2026).

Neo4j Certified Professional: Certified in Graph Databases and Cypher by GraphAcademy (Oct 2026).

Oracle Agentic AI Foundations Associate: Certified by Oracle University (Aug 2026).

NPTEL Cloud Computing (Elite Certificate): Certified by IIT Kharagpur (2026).

TATA Group Virtual Job Simulations (Forage): Completed practical job simulations in **GenAI Powered Data Analytics** (Oct 2026) and **Cybersecurity IAM Strategy** (Oct 2026).
